## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - A. <u>Claims 1-48, 71 and 72</u>, drawn to method and computer readable medium for providing discounts, classified in class 705, subclass 14.
  - B. <u>Claims 49-70</u>, drawn to a discount device, classified in class 194, subclass 217.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions B and A are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus, such as a bank-type ATM machine.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, or patentability requirements, restriction for examination purposes as indicated is proper.
- 4. Invention A is the broader of the two, and is not limited to the use of coins. Invention A (e.g., claim 2) is limited to a "phantom coin signal", but the published spec. (para. [0004]) explains that this signal can be generated by a coupon. A preliminary search suggests that conventional bank-type ATMs, and an even a PC, can read on at least the broader claims defining invention A. By contrast, invention B is limited to the use of coins. Independent claim 49 is limited to "a coin mechanism", whose plain meaning seems obvious and is supported by the spec. (para. [0020]). Independent claim 63 is limited to "a vending machine". The examiner is required to give this term its broadest reasonable interpretation (MPEP § 2111), which the examiner judges to be a coin-operated vending device (Merriam-Webster's Online Dictionary).<sup>1</sup>

¹ Unless a term is given a "clear definition" in the specification (MPEP § 2111.01), the examiner is obligated to give claims their broadest reasonable interpretation, in light of the specification, and consistent with the interpretation that those skilled in the art would reach (MPEP § 2111). An inventor may define specific terms used to describe invention, but must do so "with reasonable clarity, deliberateness, and precision" (MPEP § 2111.01.III). A "clear definition" must establish the metes and bounds of the terms. A clear definition must unambiguously establish what is and what is not included. A clear definition is indicated by a section labeled definitions, or by the use of phrases such as "by xxx we mean"; "xxx is defined as"; or "xxx includes, ... but does not include ...".

5. A telephone call was made to Samuel Borodach, Esq., on 23 March 2005 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Conclusion

- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald L Champagne whose telephone number is 571-272-6717. The examiner can normally be reached from 6:30 AM to 5 PM ET, Monday to Thursday. The examiner can also be contacted by e-mail at <a href="mailto:donald.champagne@uspto.gov">donald.champagne@uspto.gov</a>, and <a href="mailto:informal">informal</a> fax communications (i.e., communications not to be made of record) may be sent directly to the examiner at 571-273-6717.
- 8. The examiner's supervisor, Eric Stamber can be reached on 703-305-8469.<sup>2</sup> The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
- 9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov.
